# CA3006 OFFSOON Endface Cleaner

(Ver 1.00)

CA3006 OFFSOON Endface Cleaner is a fiber endface cleaner for cleaning transceiver modules or components. By using pure liquid and gas, OffSOON shoots liquid to dissolve oil and dirt and blow the end face with air stream to remove the liquid and dirt and make the endface clean. The whole process just need 1 seconds. OFFSOON comes along with SC and LC type adaptors and fulfill almost every customer's need for connectors cleaning jobs.

## Features:

1. High Cleaning Efficiency: Up to 95% cleaning effectiveness;
2. Fast Cleaning Program: less cleaning time, from 1.2s to 1s;
3. Improved Adaptors: better cleaning efficiency and product compatibility;
4. Durable Components: seal rings with longer life term
5. coming along with SC and LC type adaptors, fulfill almost every customer's need in cleaning connectors.

## **Application:**

Transceiver modules or components cleaning in manufacturers;  
transceiver modules and components cleaning in data centers.
