GM82009xx Tunable Laser Source Modules

The GM82009C, GM82009L and GM82009CL tunable laser modules offer superior performance in testing DWDM components, AWG & PLC components, and optical amplifiers, and performing other general- purpose fiber optical test and measurement applications particularly in fiber grating sensor fast sweep testing.

Each of the three tunable laser modules (i.e., GM82009C, GM82009L, GM82009CL) can be connected to a PC through a USB cable, comprising a high accuracy, high power, compact dimension, fast startup, affordable tunable laser source system. This system provides C band, L band, or C+L band tunable laser sources options. These modules can be integrated into customers' products system with RS232 interface control and output trig BNC port. UC Instruments also provide modules control software.
